

ĐINH QUỐC ĐẠT

ReactJS Intern

ABOUT ME

Information Technology student with a focus on Frontend Development using ReactJS. Skilled in building responsive web interfaces, integrating RESTful APIs, and developing web applications with modern JavaScript technologies. Seeking a Frontend Intern opportunity to enhance my skills, gain practical experience, and contribute to real-world projects.

PROJECTS

STUDYFLOW (Personal Project)

Tech: ReactJS, React Router DOM, CSS Modules, FontAwesome

GitHub: <https://github.com/DinhQuocDatIT/study-planner>

- Developed a study management application using ReactJS
- Applied React Hooks (useState, useEffect), React Router, and Component-based Architecture
- Built a Dashboard for learning data analysis with Progress Tracking and Task Analytics
- Designed responsive UI using CSS Modules

TODO CLOUD (Full-stack Web App - Team Project)

Tech: ReactJS, Spring Boot, MySQL, Docker, Google Cloud Platform

GitHub: <https://github.com/vctanngoc09/todo-cloud>

- Developed a task management system with a **Spring Boot backend**, implementing CRUD operations, task status management, and task categorization features.
- Designed and implemented **RESTful APIs** using a 3-layer architecture (**Controller – Service – Repository**), ensuring maintainability and scalability.
- Worked with **MySQL and Spring Data JPA (Hibernate)** to design database schemas, map entities, and optimize data processing.
- Integrated frontend and backend through APIs, handling request/response flows and data communication between system components.
- Containerized the application using **Docker** and deployed it on **Google Cloud Platform** to support system operation and deployment.

AWARDS

- Excellent Academic Scholarship (2024)
